

Amendments to the Claims:

This listing of claims will replace all previous versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): An array device comprising:

a substrate having a surface;

one or more binding molecules on said substrate surface; and

one or more instigators, said one or more instigators each comprising (a) a single stranded DNA or RNA or PNA compliment to one or more of said binding molecules and (b) a protein-binding moiety, said protein-binding moiety is specific for a protein.

Claim 2 (original): The device of claim 1 wherein at least two of said binding molecules are adjacent each other.

Claim 3 (original): The device of claim 2 wherein at least two of said binding molecules are separated from each other by one or more border regions.

Claim 4 (original): The device of claim 3 wherein said border regions are formed from non-binding molecules that prevent non-specific adsorption.

Claim 5 (original): The device of claim 3 wherein said non-binding molecules are hydrophobic.

Claim 6 (original): The device of claim 3 wherein said non-binding molecules are hydrophilic.
